

Cutting oil

Description

Full bio cutting oil for application on non-ferrous metals, aluminium, magnesium and their alloys. Suitable for sawing, milling and cutting. Due to the extra EP (= Extreme Pressure) additives, this synthetic cutting oil is suitable for heavy to very heavy processing. With AW additives for anti-wear. Does not adversely affect the subsequent thermal treatment of workpieces.

Characteristics:

Only suitable for spray applications.

Extra information

Item number	21121012		
Model	BC 4500-060		
Model group	BC 4500		
EAN	8718242037211		
CBS Statistics number	84671110		
Article group	TCE Machines, Lubricants & Accessories		
Brand	TCE		
Features	Volume	60 ltr	
	Fig.	3	
Article group code	944064
