

Slotted screwdriver

Description

With this compact stubby screwdriver with "flat head", slotted screws can be inserted and removed easily and quickly. This type of screwdriver is used in particular when there is little space and when screwing into softer materials. The Pard flat head screwdrivers are made from chrome vanadium and are particularly robust and durable thanks to their coating. Of course, these stubby screwdrivers are manufactured according to the applicable DIN standard. The professional screwdrivers sit well in the hand, are lightweight and have a long service life. The screwdriver handles are made from impact-resistant, unbreakable plastic. When used correctly, the screwdrivers are therefore practically unbreakable.

- Short model
- Chrome vanadium steel
- Plastic impact-resistant handle with suspension hole
- Blade extra hardened with black point
- In accordance with DIN 5264
