

Mechanical guillotine shear

Description

Electric shear of European manufacture.

The HU 1350-3 ES is a solid guillotine shear with electric motor drive. The shear is based on a heavy-duty welded steel construction that ensures stability when cutting heavy sheet metal. The HU 1350-3 ES is easy to operate with a digital control panel. Roller bearings are fitted on the bed of the guillotine shear, allowing the sheet material to roll smoothly over the bed against the material stop. The machine is equipped with a hold down system avoiding sheet sliding during operation.

With a capacity of 1350x3mm in steel, this compact sheet metal shear is ideal for e.g. construction workshops and sheet metal departments with medium duty, maintenance work or educational institutions.

Features:

- European manufacturing
- Steel construction welded frame
- Two sided hardened blades
- Motorized 750 mm back gauge
- Hold down system avoiding sheet sliding during operation.
- Front support arms for long sheet cutting with ruler
- Finger protection
- LED light
- Foot pedal control

Extra information

Item number	37070	
Model	HU 1350-3 ES	
EAN	8718242559454	
CBS Statistics number	82033000	
Article group	HUVEMA Machinery Industry	
Brand	Huvema	
Features	Cutting capacity	3 mm
	Cutting length	1350 mm
	Number of strokes	35 strokes/min
	Width workbench	390 mm
	Backgauge length	750 mm
	Backgauge power	0.75 kW
	Engine power	3 kW
	Voltage	400 V
	Dimensions b x h x d	1800 x 1250 x 1700 mm
	Weight	1260 kg
Article group code	1711549
