

Wooden workshop mat

Description

This wooden safety mat WPV 800x1000 L offers reliable floor protection in general, and in industrial floor areas in particular. The resilient support prevents fatigue thanks to its shock-absorbing effect, protects joints, spine and back and provides insulation against thermal and static influences. This sturdy, comfortable surface is therefore ideally suited to long-term standing work.

The WPV series of workshop mats is produced in Germany. The quality and workmanship of these beechwood mats is therefore of a high standard. The wooden safety grids are efficiently manufactured from kiln-dried beechwood and mounted on elastic rubber elements. As the grating consists of several slats, it is flexible and can bridge height differences on the floor. The anti-slip rubbers on the underside provide for the absorption of vibrations, an extra stable position and prevent the mat from slipping. The profile finish of the slats prevents slipping.

The WPV wooden workshop mats are perfectly suited for work on machines, packing tables, conveyor belts, work at the computer, etc. The WPV L series is Huvema's luxury version of wooden workshop mats with slanted edge at the sides and the front.

Properties

- Ergonomic design
- Resilient
- Anti-slip rubbers against vibrations and slippage
- Profile in the wood prevents slipping
- Reduces fatigue
- Maintenance-free
- Easy to clean with standard cleaning agents
- Proven German quality

Extra information

Item number	40612		
Model	WPV 800x1000 L		
EAN	8718242560627		
CBS Statistics number	40169100		
Article group	K29 - Safety, PPE		
Brand	Huvema		
Features	Width	800 mm	
	Length	1000 mm	
	Thickness	35 mm	
	Material	Beechwood	
Article group code	1892186
