

Mobile programmable air purifier with HEPA filter and ioniser

Description

Are you looking for a simple and affordable way to clean and safe indoor air? Then choose this professional, mobile air purifier in the MAXI version and equipped with the most extensive option package: the best choice for the cleanest and also healthiest indoor air quality. Thanks to the latest technology, the air purifier has a high air cleaning capacity and a high energy efficiency thanks to the EC fan. In this way, it provides perfect air cleaning even in large and crowded environments! Moreover, this air cleaner has the largest HEPA filter surface in its class. A HEPA filter is also used in aviation and is the best kind of filter you can have in your air cleaner! With this filter, you make the indoor air free of pollution, including allergens, pollen, aerosol viruses and fine dust. This air cleaner is equipped with a programming module, which can be used via an app. Moreover, thanks to the programming, the air purifier does not have to be started and stopped manually every day. Moreover, this air purifier is equipped with a bipolar ioniser, which proactively deactivates viruses and bacteria in the indoor air. This air cleaner is therefore the perfect solution and, in addition, it is plug & play, quiet and energy-efficient!

High-quality filter system

The air cleaner works with a high-quality filter system that consists of two filter layers:

- G7* pre-filter (ePM1, 50%): the best option for capturing pollen and fine dust particles, extending the life of the HEPA filter
- H14 class HEPA Filter: to filter very small particles such as PM1; this filter stops 99.995% of air pollutants

* For all educational facilities at least filter class ePM1 50% is recommended.

Applications

Our professional BOA AIR high-capacity air cleaners are ideal for use in crowded and large indoor areas, thanks to their high airflow capacity and high ACPH.

Moreover, BOA AIR air cleaners prevent the spread of viruses, thanks to the applied H14 class HEPA filters.

Suitable for :

Schools, day-care centres & universities
Offices & meeting rooms
Hotels, restaurants & cafes
Shops
Hospitals & Medical Centres

Cinemas & theatres
Airports & lounges
Hairdressers & beauty salons
Sports schools & centres
Museums & libraries
Public buildings etc.

Advantages

- Equipped with energy-efficient EC fan
- Plug & Play: no installation costs
- EN 1822 certified with HEPA filter
- Mobile and can be used anywhere
- Programmable and adjustable via an app
- Equipped with bipolar ioniser

Options:

Active 96 carbon filter: to stop bad odours

The MAXI is available in 4 models:

- * BOA Maxi (art. 43115)
- * BOA MaxION with ionisation (art. 43116)
- * BOA MAXI Smart (can be used via app) (art. 43117)
- * BOAmaxION Smart with ionisation and programming module (can be used via app) (art. 43118)

Extra information

Item number	43118	
Model	BOA MaxION SMART	
EAN	8718242563901	
CBS Statistics number	84213985	
Article group	HUVEMA Workshop Equipment	
Brand	Bomaksan	
Features	Suction power – SLOW Mode	900 m³/uur
	Extraction capacity – ECO Mode	2280 m³/uur
	Extraction capacity – TURBO Mode	3100 m³/uur
	Dimensions	780 x 720 x 1520 mm
	Electrical consumption	0,055 – 0,5 kWh
	Sound level – SLOW Mode	33 dB(A)
	Noise level – ECO Mode	52 dB(A)
	Sound level – TURBO Mode	59 dB(A)
	Weight	155 kg
	Voltage	230 V
	Ioniser	yes
	Smart	yes
Article group code	1983926
