

Workshop cabinet

Description

This cabinet is ideal for the protection and storage of various materials. The drawers open silently and easily thanks to ball bearings. Tilting is prevented by the fact that only one drawer can be opened at a time. The drawers can be pulled out up to 98%, making it easy to pick and store various products in the back of the cabinet. With different slots on the sides of the drawers, you can arrange the inlays as you wish. Each drawer has a maximum load capacity of 80 kg, with central locking. These European manufactured cabinets are very robust due to the 1.2 mm welded steelwork with reinforcement points at all 4 corners and the powder coated finish for optimal strength.
