

Horizontal toggle clamp

Description

Compact horizontal toggle clamp for clamping and loosening workpieces. Suitable for use in many applications such as welding drilling, reaming, gluing, etc. This quick release clamp ensures fast and safe clamping of the workpiece and prevents its displacement due to machining forces. Thanks to its simple and robust construction, the quick clamp is easy to use. The u-bracket allows you to adjust the position of the clamping screw. The clamp is ideal when there is not enough space for a vertical clamp. This horizontal handle clamp is the best model quick release clamp for standard workpiece clamps.

- variable clamping height, for clamping different workpieces
- applicable in tight spaces
- infinitely adjustable clamping force
- oil-resistant ergonomic handle
- high corrosion resistance
