# Protective cap chisel holder

## Description

---

Third generation safety guard for chisel holder "Made in EU"

Specific multi adjustable guard, for on the trolley of a lathe

Combined with the safety guard for the chuck, this offers an exceptional protection of the operator

Thermo formed screen in shockproof and oil resistant material

A micro switch n.2 is provided NC contacts, is a positive contact as defined in EN 60947-5-1

Protects the operator against direct contact with rotating parts of the chuck and ejected chips as well as against splashing lubricant - coolant

Suitable for:

Conventional lathes, universally applicable

Supplied with:

CE mark

CE certificate

Instruction/assembly manual

Assembled at the rear of the trolley. The screen, supported by the articulated arms thanks to a ball joint, is fully adjustable and protects against chips. Screens can be purchased separately.

Attention: a chisel holder shield requires adjustments each time to be mounted on your lathe. A safety guard must be installed by qualified personnel. The estimated working time is about 3 working hours, provided there is an emergency stop circuit. If you have any questions, please contact our technical department.

Tip: When choosing the size of the chisel holder shield, you must take into account the dimensions of the mounting bracket in order to be able to mount it on the trolley, as well as the safety of the operator.
