

Set of 5 electrodes PLASMA 70

Description

Set of 5 electrodes - PV TORCH, suitable for Telwin Superior Plasma 70 and 100 plasma cutters

The electrode generates a stable arc between the workpiece and the machine, which allows uninterrupted operations, smooth and constant operation and saves costs and time .

To withstand the very demanding operating conditions of a plasma system, our electrodes for plasma cutting systems are manufactured from excellent quality materials, providing excellent resistance to high voltage, current, pressure and temperature levels.

Extra information

Item number	T804042
Model	ELECTRODES PV 5 PCS
EAN	8004897996684
CBS Statistics number	85159080
Article group	TELWIN Laden en lassen
Brand	TELWIN
Features	Telwin 804042
Article group code	2294602
