

Shield 230h130mm with safety microswitch

Description

Strong protective cover for drills, radial drills, column drills, table drills and the like. This protective cover protects the user against chips, cooling oil and screens rotating parts, so the user can not hold the drill and then the machine can start. The protective cap is transparent and made of an excellent plastic that is placed in 4 corners. The protective cap can be mounted on almost every drill because the vertical adjustment of the rod 3 can be adjusted and the button 5 can be adjusted. The mounting bracket is very universal and easy to connect to the machine. The protective cover is equipped with a safety switch, positively operated and equipped with 1 NO contact and 1 NC contact.

Properties:

Universal steel mounting bracket

Safety switch with 1 NC and 1 NO contact.

Strong steel 6-side rod.

Button to adjust the height of the rod (3).

Button to adjust the height of the plastic protective cap.

Cap set in 4 corners, excellent quality polycarbonate plastic.

Extra information
