

Shield L 725h 300mm + safety microswitch

Description

This protective cap is 2 times rotatable and equipped with a large transparent screen. This protective cover is attached to the frame of the milling machine and can be mounted on any milling machine by its flexible settings. One can open the cover by only turning away the screen and by turning away the complete protective cover from the mounting bracket (1). A safety switch is mounted on both hinge points. The user is directly protected against touching the tool, cooling oil and chips. The screen is made of high quality shock, cooling oil and chip resistant plastic.

Properties:

Steel mounting bracket

Arm horizontally adjustable from the milling machine.

Safety switch with 1 NC and 1 NO contact.

Set point for the maximum opening distance that rotates the protective cover outwards.

Arm made of steel.

Torque discs with friction discs adjustable in between.

Bracket for mounting the screen.

Button for locking the screen.

Frame consisting of strong aluminium profile.

Plastic transparent screen of excellent quality available in various sizes.

Extra information
