

Roller blind for spindles lathe

Description

Third-generation safety guard for leispindle and feed shaft "Made in EU"

Built of two units of self-rolling rollers, made with tear and oil resistant wire.

Combined with the safety guard for the chuck and chisel guard, this offers optimum protection for the operator.

Fitted with self-guiding rollers, it is operated by the multiple springs inside.

The protective strap is made of strong textile and is resistant to coolants and cracks.

Each unit is specifically designed for its side of the wagon and fitted with suitable fixing brackets.

When the trolley is moved, the two units are rolled up and unrolled automatically, constantly protecting the operator from any jamming work clothes.

Suitable for:

Designed to fix frontally to the nut screw and feed shafts of a lathe.

Attention: such a safety shield always requires adjustments to be made to mount on your lathe. A safety guard must be installed by qualified personnel. The estimated working time is about 2 working hours. In case of questions or installation, you can always contact our technical department.

Extra information

Item number	40283	
Model	BVPAT 01/500	
EAN	8718242584036	
Article group	K29 - Safety, PPE	
Brand	TECNOPIU	
Features	Code	PAT 01/500
	Dimension A	5000 mm
	Dimension B	350 mm
	Weight	10 kg
Article group code	2350934
