

Electrode holder welding clamp

Description

Professional electrode holder welding clamp for welding currents up to 300A. It can be installed on cables with section up to 25 mm². It is made using high conductivity materials to guarantee high performance; complete insulation of the structure ensures maximum protection and safety for the operator.

- Electrode holder clamp for MMA welding.
- Maximum current 300 A.
- Cable diameter max 25 mm².

Extra information

Item number	T804170
Model	DALLAS 300 ELECTRODE HOLDER 300A
EAN	8056151813176
Article group	Products still to be classified
Brand	TELWIN
Article group code	2368206
