

Compressor pump

Description

The AB series distinguishes oil-lubricated two-cylinder compressor pumps with one- and two-stage belt drives. These compressor pumps are designed and tested according to the strictest international standards, with special attention to noise reduction and elimination of the heat generated during operation.

The Italian brand Fiac has been known for the high quality of its products for 40 years. The user-friendly, but high quality products are very suitable for both professional and private users.

Extra information

Item number	21115	
Model	CPP HU 850 AB, 2 cilinders	
EAN	8718242179195	
CBS Statistics number	84669370	
Article group	HUVEMA Parts	
Brand	Huvema	
Features	Weight	34 kg
	Dimensions l x b x h	430 x 350 x 510 mm
	Speed	1280 rpm
	Number of cylinders	2 pcs
	Fits on model	HU 850 AB
	Suction volume	830 l/min
	Effective pumping power	640 l/min
	Working pressure maximum	10 bar
Article group code	1788964
